

PORTASH MUSIC

The debut CD FRAMED LIVES of PORTASH contains 11 complex arranged dark pop hymns, forming a fertile fusion of synthetic sounds, rock guitars and impulsive and frisky electro beats. PORTASH continue consequently with what they've already announced on their EP "Rocks!". The musicians from Dresden/Germany present their own definition of modern electronic pop music. The well-defined independent sound and the distinctive voice distinguish their bittersweet and melancholic songs from others. On this also the critics agree:

"An absolutly remarkable debut."(Sonic Seducer)

"A perfect piece of work – which you want to listen to for hours." (Orkus)

"The duo celebrates superlative pop songs." (Re-flexion)

PORTASH STORY

PORTASH was founded in November 2004 when Stian Shiver and Dan Stard recorded their first song together. Legend has it that they just changed a cheerful song of The Beatles into a dark electro hymn and added some heavy rock guitars. With many sampler contributions and their debut cd FRAMED LIVES the two musicians have already achieved first success. The numerous reviews were all positive and celebrated the music of PORTASH as „ superlative pop songs“ (Re-flexion) and „ absolutly remarkable debut“ (Sonic Seducer).

PORTASH LIVE

With an eye to the perfect live performance of their complex songs PORTASH work with their own professional and highly motivated crew, consisting of sound and light technicians as well as a merchandising team. On the stage itself the band is supported by the gifted guitarist Mr. Newman. PORTASH are currently looking for more guest musicians to deliver an even more dynamic performance of their songs at future live gigs.
